

[draft-camarillo-sip-uri-parameter-reg-00.txt](#)

June 17, 2003

Expires: December 2003

**The Internet Assigned Number Authority Universal Resource
Identifier Parameter Registry for the Session Initiation Protocol**

STATUS OF THIS MEMO

This document is an Internet-Draft and is in full conformance with all provisions of [Section 10 of RFC2026](#).

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF), its areas, and its working groups. Note that other groups may also distribute working documents as Internet-Drafts.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress".

The list of current Internet-Drafts can be accessed at <http://www.ietf.org/ietf/lid-abstracts.txt>

To view the list Internet-Draft Shadow Directories, see <http://www.ietf.org/shadow.html>.

Abstract

This document creates an IANA registry for SIP URI and SIPS URI parameters. It also lists the already existing parameters to be used as initial values for that registry.

Table of Contents

1	Introduction	3
2	Use of the Registry	3
3	IANA Considerations	3
3.1	SIP and SIPS URI Parameters Sub-Registry	3

5	Acknowledgements	3
6	Authors' Addresses	4
7	Normative References	4

1 Introduction

[RFC3261](#) [1] allows new SIP URI and SIPS URI parameters to be defined. However, [RFC3261](#) omitted an IANA registry for them. This document creates such a registry.

2 Use of the Registry

Both RFC defined and proprietary SIP URI and SIPS URI parameters MUST be registered with IANA as described below.

3 IANA Considerations

[Section 27 of RFC 3261](#) [1] creates an IANA registry for method names, header field names, warning codes, status codes, and option tags. This specification instructs the IANA to create a new sub-registry under <http://www.iana.org/assignments/sip-parameters>:

- o SIP/SIPS URI Parameters

3.1 SIP and SIPS URI Parameters Sub-Registry

New SIP and SIPS URI parameters are registered by the IANA. When registering a new SIP or SIPS parameter, the following information MUST be provided.

- o Name of the parameter.
- o For proprietary parameters, a brief description of its semantics.
- o A reference to a further description, if available. For example, (in order of preference) an RFC, a published paper, a patent filing, a technical report, documented source code or a computer manual.
- o For proprietary parameters, contact information (postal and email address).

Table 1 contains the initial values for this sub-registry.

4 Security Considerations

There are no security considerations associated to this document.

Parameter Name	Description	Reference
transport		RFC 3261
user		RFC 3261
method		RFC 3261
ttl		RFC 3261
maddr		RFC 3261
lr		RFC 3261
comp		RFC 3486
