This document defines a flexible solution for support of  
Differentiated Services (Diff-Serv) over Multi-Protocol Label  
Switching (MPLS) networks.

This solution allows the MPLS network administrator to select how  
Diff-Serv Behavior Aggregates (BAs) are mapped onto Label Switched  
Paths (LSPs) so that he/she can best match the Diff-Serv, Traffic  
Engineering and protection objectives within his/her particular  
network. For instance, this solution allows the network  
administrator to decide whether different sets of BAs are to be  
mapped onto the same LSP or mapped onto separate LSPs.

This document is a product of the Multiprotocol Label Switching  
Working Group of the IETF.

This is now a Proposed Standard Protocol.

This document specifies an Internet standards track protocol for  
the Internet community, and requests discussion and suggestions  
for improvements. Please refer to the current edition of the  
"Internet Official Protocol Standards" (STD 1) for the  
standardization state and status of this protocol. Distribution  
of this memo is unlimited.

This announcement is sent to the IETF list and the RFC-DIST list.  
Requests to be added to or deleted from the IETF distribution list  
should be sent to IETF-REQUEST@IETF.ORG. Requests to be  
added to or deleted from the RFC-DIST distribution list should  
be sent to RFC-DIST-REQUEST@RFC-EDITOR.ORG.

Details on obtaining RFCs via FTP or EMAIL may be obtained by sending an EMAIL message to [rfc-info@RFC-EDITOR.ORG](mailto:rfc-info@RFC-EDITOR.ORG) with the message body help: ways\_to\_get\_rfcs. For example:
